

B.U.D.S

PROGRAM INSTALLATION

INSTRUCTIONS

This is intended as a guide only and installation will vary depending on your operating system and PC , BUDS programs will work fine on all windows operating systems up to & including Windows 7

As a basic guide you have to:

- 1 – Install drivers for MPI-2 interface.**
- 2 – Install BUDS programs.**
- 3 – Unprotect BUDS with the licence key we provide.**

There are installation Wizards that guide you through each step of the way when installing the drivers and programs so please follow these prompts!!

1 – Install drivers:

Insert BUDS disk

Plug in MPI-2 interface - found new hardware

Click 'install drivers'

VCI set up wizard

Follow wizard prompts

Follow prompt – restart computer

NOTE sometimes the wizard cannot find the drivers automatically , you may have to tell it to look on the disk - “MPI-2 drivers”.

MPI-2 is installed correctly when you get the green light on!!

2 – Install BUDS Programs

Click on the BUDS folder for whatever program you are installing

Click on the BUDS icon to start installation

Follow installation prompts – select language ect.

Enter YOUR details , your name , password (we suggest simple as you will use it a lot!!) & ANY 6 digit number for dealer number.

Follow prompts.

BUDS program will install.

3 – Install licence key

Plug in your MPI-2 unit and open BUDS program

Page “Access privileges” will appear as shown below

WE WILL PROVIDE LICENCE KEY!!! - contact us!!

we will ask you to confirm that you are all installed & ready for licence keys , licence keys only have a 24-36 hour life where they are valid to be installed , make sure you can receive/access emails quickly!!!.

Once provided we suggest you Copy/Paste your licence key into the “Access code” section , then Click the ADD button.

Once ADD has been clicked **YOU MUST click OK button!!!!**

This is highlighted in RED on the image below.

If multiple BUDS programs are installed open each in turn & install the corresponding licence key into each – click that ADD then OK button!!!!

IMPORTANT NOTES

1 - MAKE SURE your PC is set to exact correct time & date

2 - We have found in some screen setups the 'OK' button (highlighted below) is not visible , in most cases moving the toolbar to the side will give access to the button , in extreme situations we have had to turn the screen display 90deg to gain access to the button!!!

To finish installing BUDS this button MUST be clicked

3 – BUDS diagnostic can be installed in multiple PC with the same programs & licence key , however the installation MUST be done on all machines within the lifespan of the licence key , usually 24-36 hours from when we send this through to you!! , remember your MPI-2 must be plugged into the PC for the licence key page to come up!

4- make sure you install this on a GOOD PC!!!

please dont come back to me 2-3 months after install saying your old PC crapped out and you want to install again & want new licence keys, licence keys cost money!!! , we will of course try and help out if your PC fails or is damaged but please dont expect new keys just because you are updating!! , get a good PC first!!
